

### **Fleet:** *What is FUSE, and how does it help me?*

**Provider/HDATP Rep:** FUSE is a payment solution powered by TreviPay that simplifies billing and payments for fleets. With one account, fleets can access the trusted HDA Truck Pride network nationwide and manage all invoices through a single, centralized billing process. This eliminates multiple invoices, payment delays, and fees—keeping your trucks on the road and operations running smoothly.

### **Fleet:** *Why should I sign up for FUSE?*

**Provider/HDATP Rep:** Because paying for repairs shouldn't slow you down. FUSE makes things simple by giving you a dedicated credit line across participating service providers, so there's no delay in getting trucks back on the road.

### **Fleet:** *What if my fleet already has payment terms with our preferred service provider?*

**Provider/HDATP Rep:** That's great! FUSE lets you extend that convenience across multiple service locations, so you don't have to reapply for terms at every shop. It's a unified credit line that works wherever FUSE is accepted across the U.S.—giving you more flexibility when and where you need repairs.

### **Fleet:** *Do I have to pay upfront, or how does billing work?*

**Provider/HDATP Rep:** With FUSE, you get a dedicated credit line that works at any shop or Provider offering the FUSE program. There are no upfront payments, making cash flow management a lot easier. It's a predictable, stress-free way to handle your vehicle repair expenses.

### **Fleet:** *Where can I use FUSE?*

**Provider/HDATP Rep:** FUSE is available at a growing number of shops and Providers in the HDATP Truck Pride network across the United States. As more shops join, your options expand, giving you access to reliable service without having to worry about different payment terms for each location.

### **Fleet:** *Are there any fees to sign up?*

**Provider/HDATP Rep:** There are no fees to register, and no invoicing fees. Signing up is simple, and once you're approved, you can start using FUSE immediately. It's all about saving you time, reducing hassle and keeping your trucks on the road.

### **Fleet:** *How do I get started?*

**Provider/HDATP Rep:** Super easy—you can scan the QR code to register your fleet, and we'll help you get set up. If you have any questions, let's walk through it together.
